

Mohamed Showqath N

Backend Developer & AI Engineer

mshowqath@gmail.com | github.com/showqathmdcse | linkedin.com/in/n-mohamed-showqath | showqathmdcse.github.io/showqath-s-portfolio

PROFESSIONAL SUMMARY

Backend Developer and AI Engineer with experience building scalable microservices, RESTful APIs, and AI-powered applications. Proficient in Java Spring Boot, LLM integrations, RAG pipelines, and secure authentication (SSO/RBAC). Skilled in event-driven architectures, agentic AI workflows, and multi-cloud AI tooling.

TECHNICAL SKILLS

Languages	Java, TypeScript, SQL
Frameworks	Spring Boot, Spring Security, Spring AI, Spring Cloud, Hibernate/JPA, Node.js
AI & ML	LangChain, CrewAI, RAG Pipelines, Vector Databases, LLM Integration, MCP (Model Context Protocol), Agentic AI, Spring AI
Databases	PostgreSQL, MongoDB, Redis, Elasticsearch
Security	SSO, OAuth2, RBAC, JWT, Spring Security
DevOps & Tools	Docker, CI/CD, GitHub Actions, Git, Maven, Kafka, RabbitMQ, Swagger/OpenAPI
APIs	REST APIs, Microservices Architecture, Event-Driven Architecture

PROFESSIONAL EXPERIENCE

Backend Developer | Ascendion

Jun 2024 - Present

Project: AAVA-AGENTIC PLATFORM — Enterprise agentic AI platform with agents, guardrails, knowledge bases, MCP integrations, tools, and workflows

- Developed microservices architecture using Spring Boot with service discovery, API gateway, circuit breakers, and distributed tracing
- Implemented SSO and RBAC security framework with OAuth2, JWT, and Spring Security for fine-grained access control across distributed services
- Built RAG (Retrieval-Augmented Generation) pipelines using Spring AI and LangChain with vector databases for enterprise knowledge management
- Integrated agentic AI workflows using CrewAI and MCP for automated task orchestration and intelligent decision-making
- Designed event-driven architectures with Kafka for real-time data processing and inter-service communication
- Developed RESTful APIs following OpenAPI specifications consumed by multiple internal and external services

PROJECTS

AAVA-AGENTIC PLATFORM

Enterprise agentic AI platform featuring autonomous agents, guardrails, knowledge bases, MCP integrations, tools, and workflows. Includes SSO/RBAC authentication, RAG-powered document Q&A, event-driven microservices architecture, and scalable API gateway with circuit breakers and distributed tracing.

Tech: Spring Boot, Spring AI, LangChain, CrewAI, MCP, RAG, OAuth2, Kafka, Docker, PostgreSQL

AAVA Code - Multi-Cloud AI Coding Assistant CLI (Personal Innovation)

Built a terminal-based AI coding assistant supporting multiple cloud providers (Azure OpenAI, Amazon Bedrock, GCP Vertex AI). Features include file read/write/edit operations, bash execution with safety controls, conversation persistence, token usage tracking, and interactive provider/model switching via slash commands.

Tech: TypeScript, Node.js, Azure OpenAI, AWS Bedrock, GCP Vertex AI, Commander

AWARDS & CERTIFICATIONS

- Champion of Excellence Award** — Ascendion
- Generative AI Level 301** — Cognixia (Sep 2024)
- Generative AI Level 201** — Cognixia (Aug 2024)
- Generative AI Level 101** — Cognixia (Aug 2024)

EDUCATION

- B.E. Computer Science and Engineering** — Vel Tech High Tech Dr. Rangarajan Dr. Sakunthala Engineering College | CGPA: 8.7 (2020 - 2024)
- HSC** — K.C. Sankara Linga Nadar Hr. Sec. School | 72.5% (2020)
- SSLC** — Bhagyam Chellaihr Matriculation Hr. Sec. School | 84.2% (2018)
